

Material index

We understand that selecting the right Material for a project can be a daunting task. With so many options available, it can be challenging to determine which Material is the best fit for your specific application. That's why we have created this index to help simplify the decision-making process.

WOOD/VENEER

VENEER

The PR-veneer panels are a range of ready-to-use panels produced in Belgium for interior applications, marked by contemporary designs in high and consistent Quality and easy processing. PR-veneer has the desired look and benefits of a panel made with solid hardwood lumber without the disadvantages. PR-veneer panels guarantee a uniform quality with the natural and lively aesthetic of wood, both visually and sensorial pleasing. They fit very easily into any commercial, retail, hospitality or residential project and offers limitless possibilities for millwork applications such as living, bedroom and office interiors.

A GENUINE WOOD TOP LAYER

The top layer of PR-veneer is a sheet of real wood veneer assembled according an unique mix and match technique developed over decades of experience. The surface is gently brushed, stained and lacquered. The result is a surface pleasant at touch and where the protection, the natural feel and exclusive appearance of the wood are all very well balanced.

MAINTENANCE TIPS

Normal maintenance involves no more than removing dust with a soft, dry cloth. A slightly damp cloth can be used, but be careful not to use too much water. If liquids are spilled, it's recommended that they should be dried off immediately. Tough dirt can be removed using water and a mild cleaning agent or a detergent. Never use a cleaning based on acetone or ethyl butyl acetate. Wax and oil can also cause damage.

SUSTAINABLE SOLUTION

Exclusively green energy is utilized for the production of the panels, including solar energy from the roofs of production halls and externally sourced green energy. The most environmentally friendly technology is employed for staining and lacquering, ensuring no harmful emissions. Both the MDF core and the real wood top layer are FSC certified, guaranteeing responsible forestry practices. The glues, stains, and varnishes used in the manufacture of PR-veneer are free from harmful VOCs (volatile organic compounds).

TECHNICAL DETAILS

Composition: Top layer of real wood veneer stained and UV protected with six layer of UV lacquer, a core of MDF with density of 730kg/m³ and a backing layer veneer. The double-sized panels are both sides equally finished with the same design.

ADVANTAGES

-  EASY TO CLEAN
-  UV PROOF
-  PURE WOOD
-  NO ADDED UREA-FORMALDEHYDE
-  FSC

STONE / CERAMIC

STONE

Our stones are versatile porcelain surfaces that combine the beauty of nature with technological innovation. When nature meets technical innovation the result is the Paul Rogers stone, a porcelain stoneware surface developed to fulfill a wide range of applications. A Material that seeks to combine the functionality and performance of the Material while allowing maximum scope for customization, our stone opens the door to exceptional creativity versatility in aesthetics and Color, with a range of surfaces in various designs to suit the most varied of styles.

SUSTAINABLE SOLUTION

Made from a natural blend of selected ceramic clays and mineral-based Colors, our stone sintered surfaces combine the typical characteristics of porcelain stoneware, long-lasting, stable and resistant to high temperatures, atmospheric stress and UV rays. Also waterproof, highly resistant to stain and scratches, hygienic and easy to clean, with appearance of natural stone!

MAINTENANCE TIPS

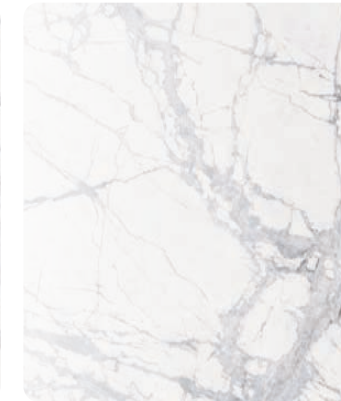

The Material is high temperature resistant. However is always advisable to use an adequate pan-support whenever hot cookware are placed on the top of the surface. For daily cleaning, a damp microfiber cloth is enough. For regular cleaning, we suggest using a neutral liquid detergent with a soft sponge or a microfiber cloth. Persistent stains can be removed with a slightly abrasive sponge, if necessary, use a specially formulated stain remover. Remove any spills of staining liquids (such as coffee, tea, red wine), caustic substances, acids and Colorants as soon as possible and rinse with water.

ADVANTAGES

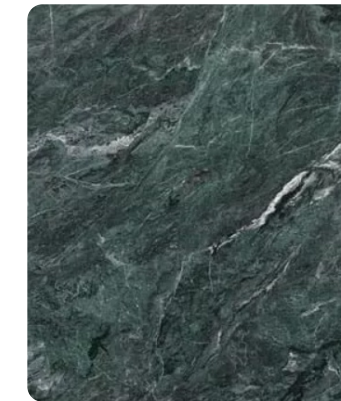

-  EASY TO CLEAN
-  STAIN RESISTANT
-  WATERPROOF
-  UV PROOF
-  HEAT RESISTANT
-  HYGIENIC RESISTANT TO FUNGI AND BACTERIA.

MORTEX

MORTEX

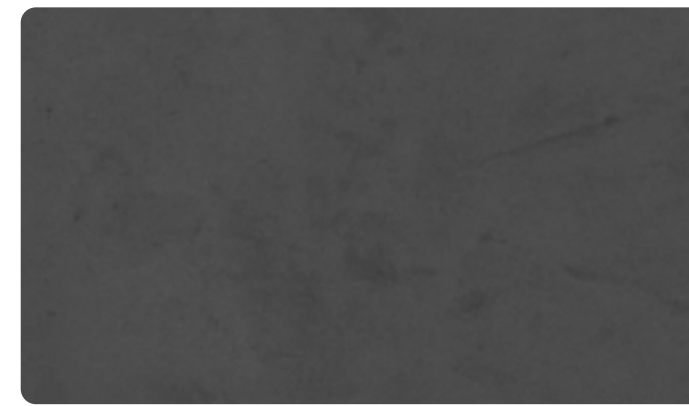

Mortex is a composition of minerals, lime and mortar. The Material is used for those who wish to combine technicality, originality, personality and aesthetics. Used both for its technical qualities and its decorative advantages, it offers interior and exterior architectural projects a mineral appearance. Thanks to its thinness and impermeability, the Material adapts to all shapes and surfaces. The Material is applied by hand which makes the products very unique.

MAINTENANCE TIPS

Each table of our collection is varnished, which means it is better to use a neutral cleaning agent. Daily cleaning with a sponge or cloth with mild nourishing soap (without caustic substances) is sufficient. For example, a solution of 1 litre of warm water diluted with 1 to 2 tablespoons soft soap. We always recommend you to do a test on a small area !

ADVANTAGES

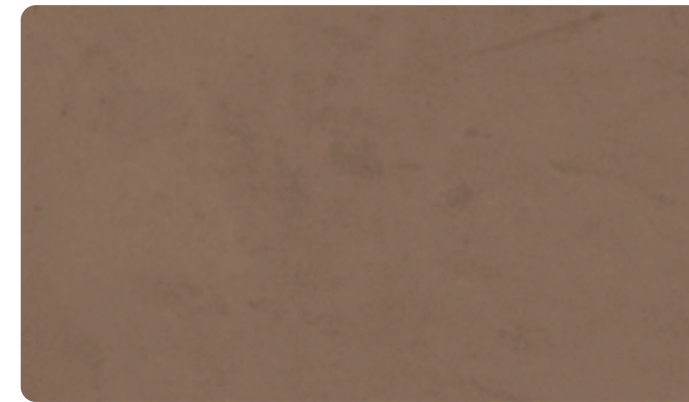

-  EASY TO CLEAN
-  STAIN RESISTANT
-  WATERPROOF
-  UV PROOF
-  HEAT RESISTANT
-  HYGIENIC RESISTANT TO FUNGI AND BACTERIA.

METAL

METAL

Metals have unique properties, such as strength and ductility, which make them ideal for use in many applications. They can be formed into various shapes and Sizes. Despite their durability, metals are not immune to corrosion or wear and tear. Proper maintenance and protective coatings can help extend the lifespan of metal Materials.

MAINTENANCE TIPS

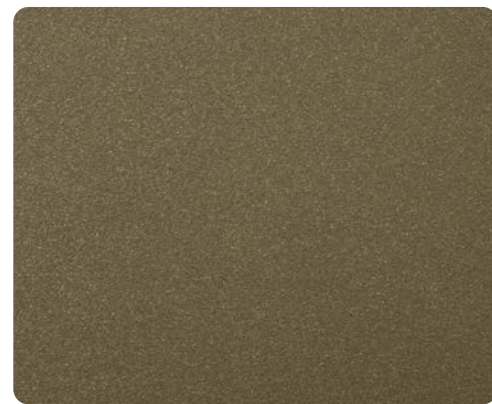

Wipe down your metal furniture with a soft, damp cloth on a regular basis to keep it clean and free of debris. Avoid harsh chemicals: While metal furniture is durable, harsh chemicals can damage the surface. Avoid using abrasive cleaners or solvents, as they can scratch or dull the metal. By following these tips, you can help ensure that your metal furniture stays in great condition for years to come.

ADVANTAGES

-  EASY TO CLEAN
-  POWDER COATED
-  UV PROOF
-  SCRATCH RESISTANT
